

SCIENTIFIC FAIRY TALES
FOR EVERY DREAMER...
2023

SCIENCE SYNERGY CENTER
ZSC LTD.

ZSC LTD. - SCIENCE SYNERGY CENTER, BASED
IN LATVIA.

OUR MISSION IS TO PUBLISH HIGH-QUALITY
BOOKS AND ORGANIZE EXPLORATORY,
CREATIVE EVENTS FOR CHILDREN AND TEENS
TO DEVELOP THINKING, CREATIVITY AND
ENCOURAGE THEM TO DREAM.

ABOUT THE BOOKS

The **'The Mission of Solu Juno Ori'** book series introduces readers to the mysteries of the Universe and the depths of the Earth. The main characters create innovative technologies and move through time and space, celebrate holidays, study the traditions of the Earthians and find out that the most essential thing in every moment is to spread love and goodness, but to create true wonders, good intentions and faith are needed.

- The stories tell more and less known facts about the Universe, which friends discover during their Milky Way galaxy expeditions - they learn about planets and black holes, visit the strangest and most interesting places on the Earth and inside it.
- Friends spend their every day in colourful adventures, search for answers to the unknown and discover explanations of different processes and phenomena.
- The dialogues use puns and unusual comparisons to help the reader understand difficult subjects and phenomena easier.
- Dialogues contain idioms to highlight the diversity of the language.
- Fantasy is used to encourage creativity and dreaming - what was once a fantasy may become reality.
- Each character is created as an

unique being with vivid character features, interests, and a significant role in shared adventures.

- Love, dignity, helpfulness, generosity, forgiveness, honesty, and humour dominate friends' mutual relationships.

The Mission book series is dedicated to readers of all ages, starting with eight-year-olds. The books are infused with a loving attitude towards parents, nature and knowledge. Children and young people are interested in exploratory scientific information, the characters' friendly and fun relationships and creative problem-solving. Adults appreciate the humorous language of the book's characters, full of atypical words and comparisons. The books encourage the creative expression of readers and provide unusual insight into everyday life.

'The Adventures of Solu Juno Ori' - bilingual fairy tale series in pictures for children up to the age of seven. The book is created to promote the learning process, language learning, reading skills, expand vocabulary and stimulate positive social skills. Book includes specific pages for readers creative works – to express creativity by writing, drawing etc.

The picture book is based on the motives of the 'The Mission of Solu Juno Ori' Part I.

THESE BOOKS ARE WRITTEN BY LATVIAN AUTHOR RIZIN AND ILLUSTRATED BY AN AWARD-WINNING LATVIAN PAINTER, ILLUSTRATOR, AND GRAPHIC DESIGNER GITA TREICE.

ABOUT THE AUTHOR

The author is a Latvian writer, pseudonym – RIZIN, who has been active in science for more than 30 years – obtained a PhD, regularly publishes scientific articles, participates in the development of innovative technologies, has ten years of experience in pedagogical work.

Combining an endless interest in science and the Universe, as well as the love for

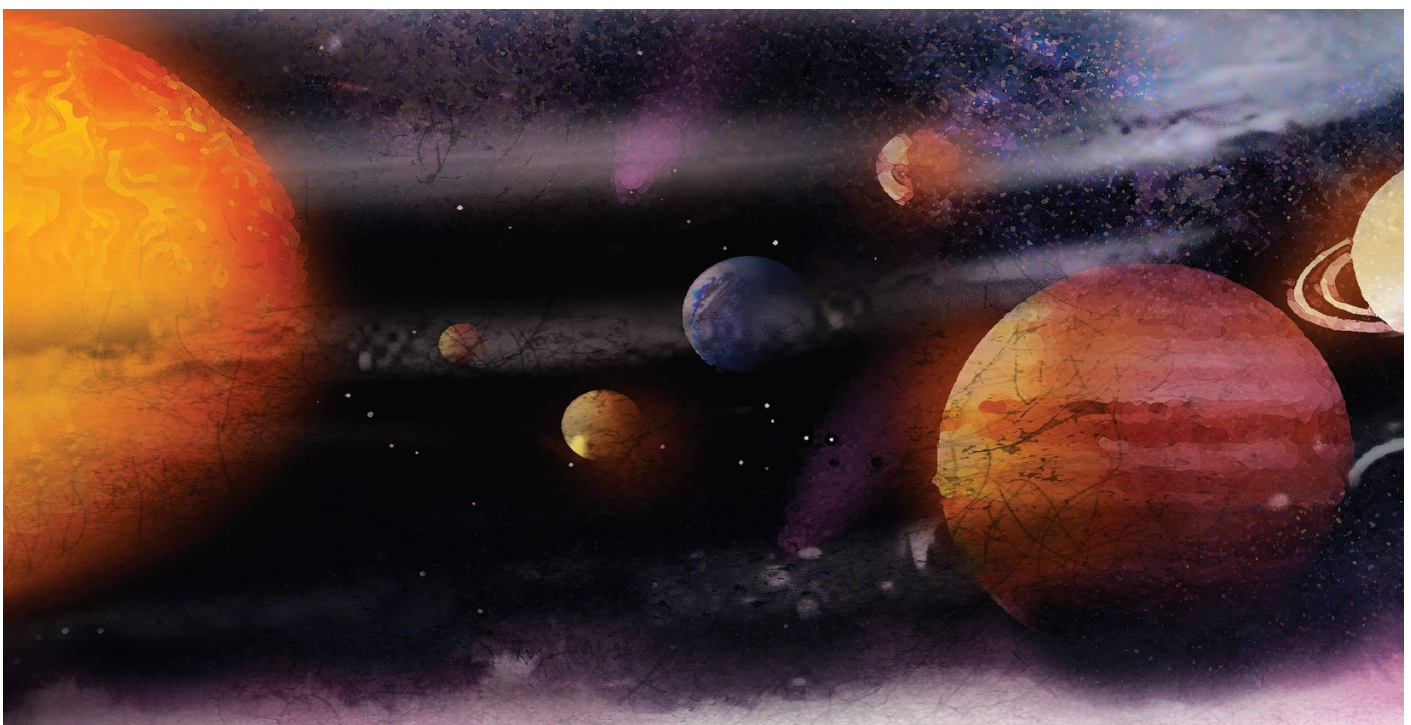

literature, the author created scientific fairy tales to give people hope, courage, faith, the ability to see the good, as well as to dream and smile about the generally accepted standards of life. The book's characters, expressing the author's ideals, encourage readers to think, feel and act positively in various life situations.

ABOUT THE ARTIST

Gita received a Master of Arts Degree from The Art Academy of Latvia. She illustrated and designed more than 100 books, has received awards both in Latvia and in international book competitions. Gita is a nominee of the prestigious Hans Christian

Andersen Award and the Astrid Lindgren Memorial Award. In 2018, she received the Jānis Baltvilkas Award.

- Nominated for the book design competition 'The Golden Apple-tree 2022' in the category: books for adolescents
- Reviewed by the jury of the national 'Jānis Baltvilks Award 2023'

The scientific fairy tale follows the passages of the three beings of Light — Solu, Juno and Ori — and their friends through unusual adventures in the Milky Way galaxy.

Three friends leave their home – the distant Universe – they are sent on a secret mission to Planet Earth. Transformed into a human form, Solu, Juno and Ori befriend the Earthlings. They help to learn the subtle nuances of survival and behaviour on Earth, while Earthlings learn the order and laws of the Universe.

In scientific expeditions, friends explore planets, black holes, different phenomena of the Universe, the inner Earth, the World's Ocean, and travel around the strangest and most interesting places.

Solu, Juno, Ori and their friends use the latest super technologies and travel through wormholes and portals with astroplane, hyperplane and toroplane.

Each character is created as a unique being with vivid character features, interests and a significant role in shared adventures. Love, dignity, helpfulness, givingness, forgiveness, honesty and humor dominate their mutual relationships.

The 2nd part of the book 'The Mission of Solu Juno Ori' is devoted to every dreamer, especially children who have lately born and sometimes feel confused when facing daily life on Earth. There is a child in each of us, which to hear and feel is a great art nowadays. The book creates a homey sense to the Soul so that, when immersing in the daily routine, we do not forget that we came from higher realms and they are still within our reach. Beings of Light from the distant Universe - Solu, Juno and Ori - remind us that communicating with our Soul and Spirit makes it possible to create miracles in everyday life. As consciousness rises to higher and higher vibrations, other abilities and possibilities open up for us: to dream, communicate telepathically, teleport, levitate, create, and explore the world and ourselves in an attractive, humorous and inspiring way.

The characters invite readers on unforgettable explorative journeys and fun adventures and teach to spread Love, Light and Joy - the greatest forces in the Universe.

Kas radījis Mēnesi

Draudzenes nevar iemigt, tādēļ nolēm j teleskopā pavērot zvaigžņotās debesis un atrast kādu spožāku zvaigznīti. Drīz vien redzeslokā nonāk arī Mēness. Pētot tā krāterus, viņas pamana kustību. Tur kāds viņām mā j un aicina ciemos! Solu steigšus sasauc zemiešu draugus, un viņi nolēm j doties ekspedīcijā uz Mēness neredzamo pusi.

Izrādās, tā ir apdzīvota! Tur apmetušies dažādu civilizāciju pārstāvj i, kas nepārtraukti atlido un aizlido ar jociģa paskata lidojošiem šķīvīšiem.

Who made the Moon

The friends are finding it hard to fall asleep and so decide to use the telescope to look at the starry sky, searching for a bright star. Soon, the Moon comes into sight. Staring at its craters, they notice a strange movement on the Moon's surface. Someone is waving at them, inviting them to go and visit! Solu quickly gathers her Earth friends and they decide to head off on an expedition to the dark side of the Moon. They are amazed to find that it is inhabited! Members of different civilizations have settled there and fly on and off the planet in all manner of peculiar-looking flying saucers.

Šūpoles

Stipri lietainā vasaras ritā draudzenes viesojas pie Tinas.

— Solu, vai vari izgaiņāt mākoņus, lai redzama Saule? — Tina izaicina draudzeni.

— Labs ir, tūlīt! — atsaucas Solu un aizskrien pār pļavu tumšo mākoņu virzienā.

Te pēkšņi debesis parādās varavīksne.

Solu veikli sabiezina varavīksnes loku un abas ar Ori apgriež to otrādi. Dota abus varavīksnes galus pielīmē pie tumšajiem mākoņiem — šūpoles gatavas.

— Skrienam šūpoties! — Sisija iesaucas.

The Swing

One very rainy summer morning, the girls call round to visit Tina.

'Solu, could you chase away the clouds so we can see the sun?' Tina challenges her friend.

'Sure, just give me a minute!' Solu agrees, running across the meadow towards the storm clouds.

Suddenly, a rainbow appears in the sky.

In a flash, Solu turns the rainbow into a solid arc and, with Ori's help, turns it upside down. Dotty then glues both ends of the rainbow to the storm clouds and, look — the swing is ready!

'Let's play on the swing!' Sissy exclaims.
